Professional Summary

Data-focused Computer Science graduate with strong experience in designing data workflows, KPI tracking, SQL analytics, and process optimization. Skilled in data cleaning, validation, reporting automation, and supporting AI/ML workflows. Passionate about improving operational efficiency and building scalable, high-quality human data systems. Seeking Human Data Manager role at micro1 to drive data excellence and operational impact.

Education

Bachelor of Engineering – Computer Science 2022–2026
Adichunchanagiri Institute of Technology — CGPA: 7.40 / 10
Pre-University Course (Class XII) 2020–2022
Government PU College — 59.9%

Certifications

- IBM Data Science (DS0101EN) – IBM Developer Skills Network
- IBM Data Analysis with Python (DA0101EN) – IBM Developer Skills Network
- IBM Python 101 for Data Science (PY0101EN) – IBM Developer Skills Network
- Complete Data Analytics with AI – GeeksforGeeks
- GFG 160 – 160 Days of Problem Solving – GeeksforGeeks

Core Skills

Data Workflow Design — SQL — Python — KPI Monitoring — Data Cleaning — Quality Assurance — Reporting Automation — Process Optimization — Dashboard Development — Cross-functional Collaboration

Technical Skills

Programming: Python (Pandas, NumPy), SQL
Data Operations: Data Validation, Annotation Basics, ETL Concepts
Visualization: Power BI, Advanced Excel (Pivot Tables, Formulas)
Concepts: Data Governance, Workflow Optimization, AI/ML Data Preparation
Tools: Git, GitHub, Jupyter Notebook

Relevant Experience

AIML Intern – Net2Next Feb 2025 – Mar 2025

- Designed structured data workflows for cleaning, validation, and analysis.
- Established KPIs to monitor data quality and operational efficiency.
- Automated repetitive data processing tasks using Python.
- Collaborated with cross-functional teams to refine requirements and improve data accuracy.
- Supported dataset preparation for AI model evaluation and experimentation.

Data & Operations Projects

KPI Monitoring Dashboard
Built automated dashboard to track operational metrics and identify performance bottlenecks.

Data Validation Pipeline
Designed SQL-based validation framework to ensure consistency and integrity of datasets.

Attendance Analytics System
Implemented structured workflow for collecting, cleaning, and reporting time-series data.

Predictive Analytics Workflow
Prepared structured datasets and evaluation metrics to support ML model performance analysis.

Professional Attributes

- Strong ownership mindset with proactive problem-solving approach
- High attention to detail and commitment to data quality
- Comfortable working in fast-paced, performance-driven environments
- Clear communicator capable of translating data into actionable insights
